

Thank you for your interest in the Hycomp Odyssey line of Oil-free booster compressor systems. We prepared this tool kit for an easy three-step process to **One - Size, Two - Price, and Three - Quote**. Please take a moment to read these simple instructions which explain how to use the attachments in this tool kit.

One - Size:

- a. Obtain your customer's following information:

- Inlet Pressure
- Discharge Pressure
- Flow Rate (SCFH)

- b. Access the attached 'Odyssey Calculation Program.xlsm' excel file

- Input parameters in orange fields

- Press 'Print' button format to performance data to be presented to the customer/end user

**Note - If parameters do not fit in a standard compressor, call Hycomp for additional compressor selections*

Two - Price:

Access the attached 'Odyssey Price List.pdf' adobe file

Reference above compressor selection/solution for list price (for example DS060)

**Note - Dealer discounts are not included in price list. If applicable, contact Hycomp for details*

Three - Quote:

- a. Access the attached 'Odyssey Quote Wording.doc' word file

- Search for compressor solution (for example DS060) and find correct horse power motor

- Update with customer's conditions, copy, and paste applicable description into quote document

- b. Access and attach any of the other literature documents desired:

- 'Odyssey Data Sheet.pdf'
- 'Odyssey Easy Installation.pdf'
- 'Odyssey Quick Start Guide.pdf'
- 'Odyssey Easy Maintenance.pdf'

We look forward to working with you! Please contact us if you have any questions or concerns regarding this toolkit, Hycomp products, or other literature.

Sincerely,

The Hycomp Team
